## QUESTIONNAIRE 1

**in the field of Legal requirements and cross-border policy development in the area of floating offshore wind turbines (FOWT) of the Black Sea**

1. What type of organization do you belong to?

- a) University;
- b) Research institute;
- c) NGO;
- d) Local administration;
- e) Economic agent;
- f) Other than those mentioned.

2. Where does your organization operate?

- a) On the continental or coastal land area;
- b) In the coastal area;
- c) In the onshore maritime area;
- d) In the offshore maritime area.

3. What is the field of activity of the organization you represent?

- a) Marine fishing;
- b) Marine aquaculture;
- c) Extraction of inorganic/non-living resources (Oil, Gas, Gravel, Sand, Salt, Water, etc.);
- d) Maritime transport;
- e) Submarine cables and pipelines;
- f) Hydro technical works and Coastal protection;

Funded by  
the European Union

- g) Hydro technical works against flooding;
- h) Tourism;
- i) Dredging and unloading;
- k) Underwater cultural heritage;
- l) Military training areas;
- m) Education;
- n) Research and development;
- o) Legislative / Public Administration;
- p) Others .

4. Specify the relations of your field with other maritime activities; with:

- a) Marine fishing;
- b) Marine aquaculture;
- c) Extraction of mineral/non-mineral resources (oil, gas, gravel, sand, salt, water, etc.)
- d) Maritime transport (port areas, shipping lines):
- e) Submarine cables and pipelines (routes, safety and protection zones):
- f) Hydro technical coastal protection works against landslides and coastal erosion:
- g) Hydro technical works against floods:
- h) Tourism
- i) Dredging and unloading
- j) Underwater cultural heritage
- k) Military training areas
- l) Education
- m) Research and development
- n) Legislative / Public Administration;
- o) Others.

the European Union

5. Specify the relations of your domain with the marine environment in the offshore area, with:
- a) Impact of environmental conditions (temperature, salinity, density, winds, waves, currents, gas emissions);
  - b) The impact of your activity on the environment;
  - c) Marine Protected Areas;
  - d) Natural resources (biodiversity, conservation, etc.; fish, aquatic mammals, clams, snails);
  - e) Algal blooms (microphysics, macrophysics);
  - f) Eutrophication/Pollution;
  - g) Impact of climate change;
  - h) Earth Pressures;
  - i) Urban areas/ Built-up areas / Coastal constructions;
  - j) Marine/Maritime pressures.
6. Are there problems encountered in the implementation/running of your current activities (legislative, economic, etc.)?
7. Are there development plans for your domain in the marine area?
- a) In the short term (1-5 years) - until 2025
  - b) In the medium term (5-10 years) - until 2030
  - c) In the long term (10-30 years) - until 2050
8. What is/are your plan/forecast/outlook/investment/strategy or initiative to improve or expand your domain in the offshore marine area?
9. Write us the place/area/area or the coordinates where you propose expansions or new activities of yours in the offshore area of the Black Sea.
10. How have the COVID-2020 restrictions influenced your activity?
11. Describe other issues that you consider important for the study of legal requirements and cross-border policy development in the Black Sea Floating Offshore Wind Turbine (FOWT) area.

**Funded by  
the European Union**

12. Can you recommend other stakeholders (companies, organizations, administrations, institutions, etc.) or decision-makers (local, regional, national authorities, etc.) who could answer the questions of the questionnaire?

Thank you,
