

Course: Bunker survey

Course aim

The overall aim of the Bunker Survey Course is to train participants in conducting safe and efficient bunker survey. The course provides the trainees with solid marine technical knowledge required to understand the role of the surveyor, the procedures for carrying out bunker survey and writing reports necessary to become bunker surveyor.

Course objectives

On completion of the Bunker Survey course, the trainees are expected to:

- understand the meaning, the role and the liabilities of bunker surveyor;
- understand and apply the procedures for bunker fuel sampling;
- understand the considerations in writing the bunker survey reports;
- demonstrate the understanding of bunker fuel tank measurement techniques;
- be able to project onboard bunker fuel quantity using consumption rates;
- understand and apply the Code of Practice for Bunkering;
- apply and deliver procedures and documentations;
- understand the international maritime laws and conventions in the field of bunker survey.

Target group

The course is designated for current and future officers of the watch on deck or engine department and other persons who are involved in bunkering operations.

Entry requirements

- General knowledge of seamanship
- High school diploma
- Working knowledge of English language
