

Course: Marine Surveying

Course aim

The overall aim of the Marine Surveying Course is to provide participants with solid marine technical knowledge required to understand the role of the marine surveyor and the details of the surveys, inspections, claims and investigations for ships and cargoes so they can perform as effective marine surveyors.

Course objectives

On completion of the Marine Surveying Course, the trainees are expected to be able to:

- Understand the meaning, the role and the liabilities of marine surveyor.
- Outline the types of surveys performed by the marine surveyor.
- Understand the considerations in writing the reports.
- Demonstrate the understanding of the purposes of marine incident investigations.
- Recognize the types and role of evidence collected for a specific incident.
- Demonstrate technical skills required for structural, hull and marine engineering surveys.
- Understand the cargo surveys, the causes of cargo damage and marine cargo claims.
- Explain the tasks of the marine surveyor in relation to specific types of marine surveys.
- Understand the international maritime laws and conventions.

Target group

The course is open to all persons having interest to learn about marine surveying, regardless of years of sea service, age or experience in marine surveying. No restrictions of nationality or employment shall apply.
