Dear Fellow Colleagues of National University «Odessa Maritime Academy»,
Dear Professor Mykhaylo Miyusov, Rector

Constanța Maritime University and the founding members of [Black Sea Association of Maritime Institutions](#) (BSAMI) have met to discuss about the pressing issues brought about by the war in Ukraine. The conclusions of this meeting will be made public in a press release by the President in office of the Association.

Constanța Maritime University, the University Senate, academics and students, vehemently condemn a useless war which can only impair both maritime industry and higher maritime educational system essential for the maritime transport. We must stress on the fact that higher maritime educational institutions are interconnected worldwide.

Without assuming this endeavor as being sufficient, we inform you that Constanta Maritime University is ready to receive students and academics of Odessa Maritime Academy, to ease their educational and training process in a normal environment. In this respect, we welcome students willing to further their education in Constanta, under the supervision of their teachers from the Academy, by using all facilities of Constanta Maritime University set at their disposal free of charge.

If you can transfer groups of students and together with their teachers, the University is able to provide housing, victuals and the educational infrastructure of the University for the continuation of studies.

If this is not feasible, the University may constitute independent series of Ukrainian students for the two accredited Bachelor's Degrees taught in English – Navigation and Marine Engineering, irrespective of the year of studies they are enrolled in. Afterwards, based on the compatible curricula, these students will benefit from the recognition of ECTS credits gained in our university.

Constanta Maritime University is extending all its support and truly hopes that this message can be capitalized for the benefit of your students and teachers.

Constanța Maritime University Senate

Prof. Dr. ...
